Personal Statement

As a highly motivated and technically proficient MSc Computer Science student at the University of East London, I bring a strong blend of data analytics, machine learning, and software development expertise. I have hands-on experience building predictive models, analysing large datasets, and developing scalable, cloud-based solutions using Python, SQL, and Google Cloud technologies. My ability to apply statistical methods, algorithms, and engineering best practices enables me to deliver efficient, data-driven insights that enhance decision-making and optimise system performance. I am adaptable, quick to learn new technologies, and effective in both independent and collaborative environments. With strong problem-solving skills and a commitment to delivering high-quality results, I am prepared to contribute immediate value across data, software, and cloud engineering roles.

Technical Skills, Certifications and Achievements

Languages: Python, C, MATLAB; **Databases:** MySQL; **Web Technologies**: HTML, CSS; Tools & Platforms: SQL, Power BI, Tableau, MS Office, Google Cloud; **Soft Skills:** Communication, Curiosity, Time Management, Problem-Solving; **Achievements:** Data Science Intern – Google Cloud (May 2024); Python for Data Science – IBM (Jul 2023); Machine Learning Using Python – UpGrad (Jun 2023); Data Structures and Algorithms (Self-Paced) – GeeksforGeeks (Jul 2022)

Education

MSc Computer Science with Industrial Placement – University of East London
May 2025 – Present

BSc Computer Science – Lovely Professional University
Aug 2020 – May 2024
CGPA: 7.10

Work Experience

Data Analyst – UpGrad

Jan 2024 – May 2024

- Built and deployed a sentiment analysis model using Python, NLTK, TextBlob, and deep learning architectures (CNNs, LSTMs, ANNs), improving classification accuracy by 18% compared to baseline.

- Analysed customer reviews and generated sentiment-based insights that helped the product team reduce negative feedback by 12% over two release cycles.
- Developed end-to-end data preprocessing workflows, reducing noise in datasets by 40% and improving model training efficiency.
- Conducted model evaluation using precision, recall, F1-score, and confusion matrices, increasing overall model reliability.
- Presented analytical findings and recommendations to stakeholders, contributing to enhancements in customer experience and product roadmap planning.

Hobbies & Interests

- **Cricket:** Builds teamwork, leadership, and strategic decision-making.
- **Badminton:** Enhances agility, coordination, and perseverance.
- **Photography:** Encourages creativity, attention to detail, and patience.
